THE M. A. C. RECORD

LEAVING EAST LANSING March 19, the Michigan Aggie basketball squad will make a post-season tour through the upper peninsula of the state during the spring vacation. Seven or eight games will be played on the trip, which will close just in time to allow the athletes to return to school for the opening of the spring term. The first stop of the journey will be made in Alpena where the Y. M. C. A. quintet will furnish the opposition. This game will be played on March 20. Two days later the Aggies will play the Alger county club at Munising and on the night after that they will appear against Northern State Normal at Marquette. Continuing at the rate of a game a day the Aggies will play the Ishpeming "Y," the Escanaba "Y," Michigan College of Mines at Houghton and the Calumet "Y."

REGISTRATION for the first of two short courses in trucks and tractors opened Monday. At closing hour on Monday, the number of registrants had reached nearly a hundred, and it was expected that additional applications arriving Tuesday would raise the number to well over this mark. The first course will continue throughout this month and the second will be started immediately after the close of the first. The instruction this year includes several trips to Lansing plants where trucks are being produced. Eight hours of lecture and laboratory work each day are required of the students.

THE OLD EUSTACE HOUSE, which was formerly on Faculty Row, next to Secretary Brown's residence, and which was recently moved over on Grand River avenue and turned into a music center, is now being utilized for a hospital.

GOVERNOR FRANK O. LOWDEN, of Illinois, one of the big attractions on the music center, is now being utilized for laboratory work each day are registered immediately after the close of the day. The nation needs a tried business man in charge of affairs at Washington, especially in these trying times of readjustment, and one who is a real farmer himself and intimately underestands that agriculture is fundamental." Governor Lowden has a 5,000-acre farm called "Sinissippi," where he lives in summer. He is a blooded-stock raiser of importance in Illinois.

AN EXHIBIT of overseas sketches is being shown at the college this week in the drawing department of the engineering building. These drawings were done by members of the faculty and students while in service, and will be on exhibition during Farmers' Week.

THE CAVALRY HORSES have at last arrived. The shipment, which left Camp Grant on January 28, includes 26 horses and two mules. The Holcad states that the cadets believe the mules are for the officers, for there is no other means of distinguishing their mounts. A 155-MM. gun twenty feet long and tractor has also arrived for the Coast Artillery unit, and an 8-inch Howitzer is in transit.

JUNIOR AND SENIOR Ag and Home Economics students were dismissed from classes Tuesday, Thursday and Friday by the faculty, to attend the Farmers' Week program.

J. W. NICOLSON, '15, Extension Specialist in the farm crops department, and secretary of the Michigan Crop Improvement Association, has just returned from a trip through the middle west where he has visited sections in Wisconsin, Minnesota, Iowa and North Dakota. His purpose was to obtain pure grimm alfalfa seed for the members of the Michigan Crop Improvement Association. Seed which was grown by the North Dakota Alfalfa Growers' Association, which had been grown in climate cold enough to kill off ordinary seed, was obtained.

AN EXHIBIT of citrus fruits by Harry Schuyler, '11, of the Leffingwell Rancho, Whittier, California, was one of the features of the Hort show held in the armory in connection with Farmers' Week.

A RURAL ENTERTAINMENT and recreational club has been organized at M. A. C. in the direction of Professor C. E. Mitchell, to make a study of these problems in rural communities with a view to suggest remedies. There is a great dearth of material for plays which are suitable for presentation in country communities. It is Mr. Mitchell's idea to have some simple plays written by members of the club—plays which require little scenery and stage setting, and which are of interest to rural audiences.

A CHEMICAL ENGINEERING society has been formed at the college for the purpose of securing information which is not available through the regular courses, and to procure, if possible, lecturers of national repute to come to the college during the year.

THE FLU EPIDEMIC, together with the several cases of smallpox and measles now on the campus brings into limelight the very inadequate facilities of taking care of the sick at a time like this.

IN SPITE OF THE FLU epidemic which has swept the state, the attendance at Farmers' Week has been up to expectations, and the interest at the meetings very keen. Several changes had to be made in the program because of illness of the speakers, but the substitutions were satisfactory. The college band has played at the opening of the afternoon meetings, which adds greatly to the enjoyment of the visitors. Alumni and former students have returned each day in large numbers, and handshakes and greetings and exchange of reminiscences have been the order of the day.

THE COAL SITUATION is serious at the college, and the authorities are scurrying around in an effort to locate a few stray carloads. Coal which should have been delivered here is held up in Toledo because of a shortage of engines. This, with the flu epidemic, and the great amount of sickness among the members of the faculty, has kept everybody occupied.
THE M. A. C. RECORD

Entered as second-class matter October 30, 1916, at the post office at East Lansing, Michigan, under the Act of March 3, 1879.

Published every Friday during the College Year by the Michigan Agricultural College Association.

FRIDAY, FEBRUARY 6, 1930.

"THE HEART OF M. A. C."

Forty-two men of M. A. C. gave their lives in the great war. Some were my pals. Others I never saw. But we are proud of them all. Each gave his life that the great cause might not die. They are M. A. C.'s war heroes that fought for their country and for you and me.

Their loss is irreparable. But the sacrifices must not be forgotten. We must perpetuate the memory of M. A. C.'s heroic forty-two.

Tablets and monuments seem so inadequate—so cold. The dead and the living would, I am sure, prefer a memorial of service. We alumni of M. A. C. are joining hands that this purpose may be brought to fruition.

On the campus of our Alma Mater—where those forty-two men, like ourselves, once worked and played and breathed the spirit of M. A. C.—there is to be erected a great building that will be "the Heart of M. A. C." It will be called the "Union Memorial Building," and will serve as the hub of student and alumni campus life.

Under its roof will grow the spirit that has made M. A. C. dear to you and me. And this will be the tribute to M. A. C.'s heroic forty-two.

It is so little to do for such a big gain, so trifling a recognition of a tremendous sacrifice. Yet unless each one of us does his part the project will fail. An average subscription of fifty dollars will mean success.

No donation is needed now. Only a pledge. You can pay in several installments. Any time in three years will do. The main thing now is to promise something. Promise as you think the amount of your merits. This is our only opportunity to do honor to our fallen comrades. It is the first big test of the loyalty of M. A. C.'s alumni.

OLIVER CARY HOLLISTER, '89.

Oliver C. Hollister, one of the best known residents of Clinton county, died at his farm home near Lansingburg on Tuesday, January 27. It is said of him that "In his death the community suffered the greatest loss that it could have experienced. He was a leader in community spirit; all the community came to him for advice and help, and he always had time to help everybody."

He served his country in the Cuban war, and the Adjutant General in charge at that time said of him, "He was a man of sterling qualities and one who could be depended upon."

At different times he held offices of importance and service in his home country, as road commissioner, drain commissioner, member of the county war board, and several other offices.

The Hollister family has always been an M. A. C. family. His father, Charles E. Hollister, graduated in the class of '61, the first class to leave this institution. His cousin, William Langley, '58, lives in St. Joseph county, and his niece, Katherine Langley, is now a freshman in college.

The funeral was held from his beautiful old farm home near Langsbury, "seven Oaks," where he has lived all his life, and where his father and grandfather lived before him. The land was taken from the government by his grandfather. As his life was lived, his body was carried on its last journey. The old family sleigh banked with evergreens, and drawn by his favorite team, bore the flower covered casket to its final resting place.

ALUMNI MEETINGS

Below is a list of local M. A. C. Associations that are holding meetings within the next month. Have you held a meeting in your locality? Are you planning to? If you are, advise the Record just as soon as possible of the time and the place so that we may include you in the list.

CHICAGO.

Saturday night, February 7, 6:30 p. m., at Edgewater Beach Hotel, 5429 Sheridan Road, dinner dance, speakers, Pres. Kedzie, Dean Bissell and Dean Shaw; an exhibit of 25 of S. J. Kennedy's best campus paintings in the hotel. Fresh hotel takes Northwestern elevated to Edgewater Beach Station and walk two blocks east. Communicate with J. H. Proctor, 606 S. Michigan Ave, Chicago.

MILWAUKEE.

Tuesday evening, February 10, speaker, J. H. Proctor, '04, Chicago. Communicate with Wm. L. Davidson, '13, 84 Mason St., Milwaukee.

WASHINGTON, D. C.

Saturday night, February 7, St. Mark's Cafe, 915 15th St., 5 o'clock; speakers, Director Brewer, and W. K. Prudden, '78, Communities with Mrs. Mary Ross Reynolds, secretary, 1516 Kilbourne St., N. W.

WESTERN NEW YORK.

Friday night, February 13, at Geneva, N. Y.; speaker, Prof. W. O. Hedrick, '91. Communicate with Dean Howe, Syracuse Univ., Syracuse, N. Y., or R. L. Nye, secretary, 293 Bassett St., Syracuse, N. Y.

BAY CITY.

Tuesday evening, February 10, for all former students in Bay, Midland, Gladwin and Saginaw counties, at the Speaker, Director Brewer. Communicate with A. C. MacKinnon, '85, 1214 Center Ave., Bay City.

SAGINAW.

Wednesday evening, February 11, speaker, E. W. Ranney, '00, Greenville, and Prof. W. O. Hedrick, '91. Communicate with Daniel H. Ellis, 616 Owen St.

JACKSON.

Round up meeting and dinner Saturday noon; Speaker, Prof. Kedzie. Communicate with E. J. Frost, Frost Gear and Forge Co.

CLEVELAND, OHIO.

Second week in February. Details later. Communicate with L. C. Milburn, 14, 1451 E. 131st St., East Cleveland, Ohio.

NEW YORK CITY.

February 12, 8 p. m., Hotel Pennsylvania, Seventh Ave. and 37th St.; speaker, Ray Stannard Baker. Alumni in Philadelphia and New York City especially invited. Communicate with O. S. Shields, '16, 719 Hancock St., Brooklyn, N. Y.

LOS ANGELES.

Early in February. Details later. Communicate with Dr. J. H. Proctor, 714 Mark's Cafe, 913 15th St., Los Angeles.

OWOSSO.

The Owosso meeting which was to be held on Saturday, February 7, is to be postponed one week, and will be held now on February 14. Communicate with H. E. Dennison, '11, Court House.

PORTLAND, OREGON.

Portland, Oregon, and vicinity will hold a meeting on February 22. Communicate with C. W. Hale, 29 Barnes Road, Portland.

MICHIGAN BASKETMEN FALL BEFORE AGGIES.

Michigan Aggies beat Michigan University in the second half of the game, the Aggies outfighting Mather's five in the final period and winning out 22 to 13 last Friday.
Another trip, the route of which will lie through Illinois and Indiana, April 1, 1918, and since that time has May 8. On one date the Aggies will play Notre Dame at South Bend. In addition to these two tours, several smaller journeys, including one to Ann Arbor on May 12, are on the program. On May 26 a game will be played at Oberlin.

Nine or ten games are listed for the East Lansing diamond. Michigan, Notre Dame, Chicago, and Oberlin are scheduled for games here, and these are but a few of the important contests which will be fought out on the Aggie field.

THE CAMPAIGN DIRECTORS.

Raymond Michael Roland, "Dad," '15, regional director, graduated from the agricultural department in 1915. Married to Jessie Maude Bostom of Indianapolis April 11, 1918. Son, Raymond, Jr., born March 26, 1919. He was a county agent at Paoli, Orange county, Ind., from September, 1915, to April, 1918, and since that time has been assistant state leader of county agents at the University of Missouri. He was a member of the class memorial committee of 1915, and as a member of that committee, was one of the first to advance the idea of a Union building.

IN THE GOOD OLD DAYS.

These paragraphs were taken from an M. A. C. catalog of 1864.

Students are required to attend prayers in the college chapel every morning; also public worship on the Sabbath, at the same place.

Students are required to board in the college boarding hall, and to observe strictly all the rules and regulations in force in the same. They are not permitted to absent themselves from the college grounds without permission.

They are expected to abstain from all immoral practices, and from everything which is inconsistent with their relations to the institution.

Shifts of duty are arranged for in their studies, prompt attendance upon all chapel exercises, recitations, lectures and field operations are uniformly required. None are excused from those duties, except from physical disability.

Room-rent for each student, four dollars a year paid quarterly in advance. Rooms are furnished with beds, bedsteads and stoves; students furnish everything else. Mattresses and pillows may be rented of the college. The cost of furniture will vary with the amount of the students occupying them. Rooms can be comfortably furnished at a cost not exceeding four or five dollars for each student.

Students receive remuneration for the labor they perform, the amount paid depending on their ability and fidelity. The highest wages for the present year have been seven and one-half cents per hour. The lowest rates do not exceed three or four cents per hour if the student fails to render valuable service.

A CRITICISM—THE KIND WE LIKE TO GET.

Olean, N. Y., January 26, 1920.

Secretary M. A. C. Ass'n, Dear Sir: I am handing you my check to cover bill enclosed. Speaking personally, I do not feel that the Record is worth very much since it carries but very little that is of interest to the students of classes of years ago. Please understand I am not criticising the staff of the Record for I realize it is not to be blamed. When each copy comes, I scan the personal columns hoping to find some item referring to one of my own class, or of one I knew when I was there. I find very little consolation for it is so seldom any personal news item appears.

Now, I realize the alumni are themselves largely to blame for this and I share my part of it. I have been thinking the matter over for some time and have decided to start a series of "Round Table" letters having them go to the members of the class of '81. At stated intervals when five or six letters are added it is proposed to have them sent to the Record that your editor may pick out whatever may be of personal interest as general news items.

A. H. Voight of Los Angeles, Dr.
Byron S. Palmer of Palmyra, N. Y., C. A. Duckstader of N. Syracuse, N. Y., and myself, all of '81, went over to Rochester, N. Y., on the 29th inst. We shall discuss this "chain letter" scheme then, and I hope it will develop something which will aid you to make the Record more interesting to us students for a long time ago. I hope this suggestion may be taken up by other classes.

I shall report to you the result of our meeting in Rochester.

Yours true,

Thad Libbey, '81.

Dr. Smith's criticism is a splendid one and the suggestion constructive. A word about him:

Dr. Smith came to M. A. C. in 1878, a poor boy without means. By teaching long terms of school winters, which took him out of his classes at college before the close of the fall term and late in returning in the spring, making special examinations necessary for his candidates to his classes, he succeeded in graduating with equal credit with his classmates of '81. After further teaching he entered Rush Medical college, graduating in 1885, and after that he began practice in Olean, N. Y. For a time he specialized on the eye and ear, but later took up general surgery, which he has since followed with much credit to himself, both financially and professionally, and is recognized as one of the leading surgeons in that part of the state.

CAMPAIGN SLANTS.

AN APPEAL TO '99.

"Secretary McKibbin of the M. A. C. Association has been sending you deputes on the project for a Union Memorial Building on the old campus, so you know as well as I do the progress of the idea. This letter is just to tell you how much our class wants to get in on the action. At the Alumni Luncheon last Commencement there were present Trenzie Bristol Ranney, George Gould, Thorn Swift, Mike Hunt, Waldo Ball, and myself. Not many of us, but we gave the old class yell, and made noise enough that the rest of the folks knew the class is still alive.

"I heard the remark not long ago that the class of '99 never showed much pep. I thought that, since he's been teaching in the History department, he might have been the psychological moment to pull Thad down the flag pole, and if we do, surely no one will ever again be able to intimate that '99 lacks in loyalty to class or college."

"If you haven't already done so, just put your name on the dotted line now before you lay this letter aside, for we all are busy and apt to forget. We'll all have just as much at the end of a year besides the satisfaction of knowing that did our right share in a big cause."

"Sincerely yours,

"S. F. Edwards, '99."

"I am glad we boyos are doing something toward a memorial at M. A. C. I have placed my subscription with P. G. Holden.

"All well with us but busier than when we were licking the Germans."

"Hastily,

"E. Davenport, '78."

SCHOLARSHIPS AT UNIVERSITY.

For several years the University of Michigan has offered State College Fellowships, the value of which in money runs from three hundred to four hundred dollars. These fellowships are given to students who graduate from a regular college and who desire to enter the University of Michigan for post-graduate work in any of the departments except medicine or law. The scholarships are open to any one and is based upon the scholarship record and general all around ability of the student during his undergraduate course.

The committee of M. A. C. to act upon applications consists of Dean Shaw, Dean Bissell, Dean Edmonds and Professor French, the latter being the secretary of the committee.

The university offers a first and second choice, that is the student with the highest rank will be placed as first choice and the one with the next rank as alternate. Both these applications are filed with the university authorities and if for any reason the student is unable to accept the scholarship it will be transferred to the alternate. Occasionally there is opportunity for two students to represent the same institution.

Any student of M. A. C. desiring to see if one of these scholarships should make application in writing to Professor W. H. French.

THE M. A. C. RECORD.

M. A. C. GRADUATES IN OTHER AMERICAN COLLEGES.

From Information Collected by Dr. Beal.

Editorial Comment—Consistent with the interest which he always had in his students, Dr. Beal has for a long time been curious to know just how many of his graduates were taking in promoting scientific work in other colleges and universities. Last spring he sent out inquiries to educational institutions all over the U. S. and we give below the information which he secured. It is interesting and inspirational to see this large number of M. A. C. men and women who are important factors in the educational life of the country.

Univ. of California, Berkeley:

H. E. Van Norman, '97, Dean of Farm and Forestry Experiment Station.

E. S. Brown, '92, teaching Vocational Agriculture and Junior College work at Pomona.

Manitoba Ag. College, Winnipeg:

Leslie John Smith, '86, Professor of Agricultural Economics.

Colorado State College, Fort Collins:

C. F. Gillette, '06, Director of Agricultural Extension Work.

C. F. Davis, '80, Assistant to the State Forester.

C. F. Davis, '80, Prof. of Economics and Irrigation.

Connecticut State University, New Haven, Conn.:

J. W. Tomney, '95, Director of Forest School.

Indiana State College, Bloomington, Ind.:

P. J. Fortune, '91, Prof. of Animal Husbandry.

Illinois:

University of Illinois, Urbana, Illinois. C. H. Spearman, '95, Dean of the College of Agriculture, Director of the Agricultural Experiment Station, Director of the Extension Service, Professor of Agricultural Economics.

W. C. Latta, '77, Farmers' Institute Extension Agent.

L. L. Jones, '12, Extension Poultry Expert.

University of Kansas, Lawrence, Kan., Ed. C. A. Duckstader of N. Syracuse, N. Y., Professor of Agricultural Economics and General Agent of the Extension Service, and General Agent of the Extension Service, and General Agent of the Illinois Agricultural Experiment Station.

University of Kentucky, Lexington, Ky.:

Charles M. Farr, '97, Assistant in Soil Fertility.

G. A. Goodenough, '91, Professor in the Engineering Department, Lewis Institute, Chicago, Illinois.

P. B. Woodworth, '96, Director Lewis Institute, now is army vocational director for the north central states.

State Normal School, Charleston, III.

T. L. Hanks, '91, Professor of Zoology and Physiology.

University of Kentucky, Lexington, Ky.:

Albert Jackson Olney, '13, Assistant Professor of Animal Husbandry.

B. O. Longyear, '03, Assistant to the State Forester.

C. F. Davis, '80, Prof. of Economics and Irrigation.

A Lansing paper recently mentioned O. C. Howe as a possible candidate for mayor. Major Paul M. Chamberlain, who is still in the service as chairman of the Chicago District Salvage Board, lives at 427 Diversey Parkway, Chicago.

Frank M. Paine, who was on a farm near Ypsilanti last fall and summer, is now back at his old line of work with the L. Bemb Floral Co. on Bates street, Detroit. He lives at 516 Putnam Ave.

Capt. H. F. Hall, "Barney," formerly of New Hope, Penn., has accepted a position as assistant manufacturing superintendent with the General Electric Co., at Pittsfield, Mass.

George C. Monroe is president of the First State Bank of South Haven.

L. B. Allison (with), recently in the jewelry business, is now retired and lives at 546 Serrano St., Los Angeles. E. M. McElroy, who is in the real estate business at 121 Pratt Ave., Kalamaoo, visited the college last week.

Robert Wadron (with) is farming near Ionia.

M. W. Fulton, who is an orchardist at Cherry Run, West Virginia, was a campus caller on January 24.

C. H. Parker, president and manager of the Parker Dairy Co., at Saginaw, says that he is in the "same old dairy business which doubled last year."

Robert Waterbury (with), U. S. deputy collector of customs, lives at 333 Maple St., South St. Marie.

Dr. Edward N. Martin (with) is a practicing surgeon at 1447 David Whitney building, Detroit.

Charles C. Gibson (with) is in the electrical department of the Detroit Edison Co., and lives at 4325 W. Jefferson Ave.

George C. Humphrey, 438 University Farm, Madison, Wis., writes, "With renewed interest and inspiration following the war depression, I am continuing to serve as chairman of the Department of Animal Husbandry. The prospects were never brighter for the training of a fine lot of students, extending research work and doing extension service."

F. C. Fox, formerly of Gaylord, is now at 518 S. Washington Ave., Lansing.

Leon L. Drake is county agricultural agent for Antrim county, with headquarters at Bellaire.

Ernest R. Graham, mining engineer at Creswell, visited the college last week.

Thomas F. Locke, 421 Webster Place, Milwaukee, is chief engineer for the A. H. Petersen Mfg. Co., likes his work and is doing nicely. He seldom runs across any of the old boys, and will be glad to see any who come to his burg.

Grant U. Strome, recently returned from overseas, is department manager for the Von-Weller-Lyon Co., 180 N. Market Ave., Chicago, and lives at 5046 Calumet Ave.

Stephen W. Dott, live stock market supervisor for the U. S. Bureau of Markets, is in charge of the short term markets under the auspices of the National Federation of Co-operative Livestock Shippers.

P. C. Schroeder is now at Bangor, Van Buren county.

F. O'Gara lives at 744 Woodmere Ave., Detroit.

C. G. Burroughs is a poultry farmer with a certified egg farm at Madison, Wisconsin.

Lieut. Colonel Wm. D. Frazer is on duty at the University of Washington with the Coast Artillery Unit of the R. O. T. C. They have 1,200 men in

Cut Down Your Cost

A number of the most successful dairymen testified before the Federal Milk Commission, which has been fixing the price of milk from the producer to the consumer, that they had cut down their costs of production by feeding Corn Gluten Feed and wheat bran freely in grain rations they mixed themselves.

The Commission must have been convinced by what these representative good dairymen had to say about different feeds and the economy of a man's mixing up his own rations.

For, in arriving at the price it thought the dairyman ought to get for his milk, the Commission based its calculations on home-mixed rations in which Corn Gluten Feed was a principal basic ingredient.

If you have not yet fed Buffalo Corn Gluten Feed, if you want to know more about how to feed it, and your dealer doesn't happen to have it, write us—giving his name.

The West offers very high salaries. Enroll early....
Take a class of men ten years out of college

Ten percent of them will have made a distinct success; sixty percent will be doing fairly well. And thirty percent will be earning no more than had they never been to college.

Why? What separates the successful ten percent from the other ninety?

The Alexander Hamilton Institute knows something about the answer to that question; for in the past ten years it has enrolled more than 110,000 progressive men in its Modern Business Course and Service.

And more than

35% were college graduates

The difference between large success in business and mediocre success is not chiefly a difference in native ability nor in the willingness to work.

It consists usually in training, and in self-confidence which specific practical training gives.

Here is a quotation from the letter of a college man, typical of many which the Institute has received:

“You may be interested in knowing that two and a half months' study of your Course has given me more self-confidence than the time spent in the University of . . . . . . only seven years ago. To that study of the Course and the self-confidence which it bred I am directly indebted for my recognition and promotion in this bank.”

110,000 self-confident men

No college man expects his arts course to fit him to practice medicine or law. He realizes that special training is necessary for those professions.

Modern business, also, deserves to be thought of as a profession.

It has as many departments as the human body has organs. A man may know selling and be utterly ignorant of costs and accounting. He may be able to organize an office and know nothing of corporation finance. He may be an engineer and advertising and merchandising may be Greek to him.

The business of the Alexander Hamilton Institute is to give men quickly and systematically a working knowledge of all these departments.

That its training is thoroughly practical is proved by the experience of 110,000 men who with its help have gained mastery of business and self-confidence; and by the character and standing of

The men behind the Institute

The highest business and educational authority is represented in the Institute’s Advisory Council. That Council consists of: Frank A. Vanderlip, the financier; General Coleman du Pont, the well known business executive; John Hays Hammond, the eminent engineer; Jeremiah W. Jenks, the statistician and economist; and Joseph French Johnson, Dean of the New York University School of Commerce.

Surely a training so directed, a training which has meant so much to 110,000 other men is worth an evening of your investigation. It is worth at least the little effort required to

Send for “Forging Ahead in Business”

Every man who wants to cut short the years of routine progress; every man who is ambitious to increase his mastery of business and his self-confidence in business, should add this 116-page book to his library. It is called “Forging Ahead In Business” and it contains information of unusual value. There is a copy for every reader of this publication. Send for your copy now.

Some Advantages of Railroad Electrification

- Saving the Nation's coal.
- Lower maintenance costs.
- Greater reliability and fewer delays.
- Ability to haul smoothly heavier trains at higher speed.
- Operation of electric locomotives unaffected by extreme cold.
- Ability to brake trains on descending grades by returning power to the trolley.

Electricity has leveled out the Continental Divide. The steam locomotive, marvelous as it is after a century of development, cannot meet all of the present demands for transportation facilities. Its electric rival has proved to be far superior.

On the mountain divisions of the Chicago, Milwaukee & St. Paul Railway—the world's greatest electrification—giant electric locomotives today lift an ever-increasing freight tonnage over the mile-high Rockies and also make traveling clean and comfortable. They utilize the abundant energy of distant waterfalls and then, by returning some of this power to the trolley, safely brake the trains on descending grades. And their capabilities are not impaired by excessively cold weather when the steam engine is frozen and helpless.

Electricity is the power which drives the trains of New York City's subway and elevated systems. It operates the locks and tugs the ships through the Panama Canal. It propels the Navy's latest super-dreadnought, the New Mexico. Electric mine locomotives have replaced the slow-moving mule and the electric automobile has also come to do an important service. Such achievements were made possible by the extensive research and manufacturing activities of the General Electric Company.

Electricity has become the universal motive power. It has contributed efficiency and comfort to every form of transportation service and in this evolution General Electric apparatus has played a large part—from mighty electric locomotives to the tiny lamp for the automobile.
