THE M. A. C. RECORD

VOL. XXVI. NO. 34   EAST LANSING   JULY 29, 1921

THE CAMPUS has been the mecca for thousands of picnickers this summer. Among the larger gatherings have been All-Campus picnics for the summer school students on July 20, and the annual picnic of Lansing Masonic Lodge No. 33 on the 23rd. The latter brought 2500 Masons and friends for whom an athletic program was arranged by Director Brewer. Nearly every day gay parties with heavily laden lunch baskets may be seen gathering on the picnic grounds.

The chief topic of faculty conversation during the past two months has been that of the annual contracts. Usually the appointments for the coming year and the ensuing contract agreements are made in the spring, but this year due to difficulties with the budget the contracts are not yet in sight. Their non-appearance and the many rumors of sliced departmental budgets are placating many faculty persons on the anxious seat.

The most successful summer school in the history of the college closed July 20. Prof. E. H. Ryder, Dean of the Summer School states that not only was the attendance the largest on record, but it attracted more students from outside who were here to take courses in agriculture and rural teaching. This included superintendents and principals of high schools. In the past the attendance has been too largely delinquents making up regular college work which they have missed or failed in.

Miss Edith Caudle, for several years instructor in Physical Training, has been appointed instructor in Physical Training at Cornell for the coming year.

East Lansing alumni members of Omicron Nu, honorary home economics sorority at M. A. C., met at the home of Agnes Hunt Cade on July 29 and organized an Alumnae Chapter. This is the first alumna organization of the Alpha chapter, which is the mother chapter of this national sorority. Steps will be taken immediately to investigate the records of and invite into membership some of the older alumnae who were in college before this organization was in existence, and whose scholarship and activities since leaving college will warrant invitation.

The "Flower Pot," tea room operated by East Lansing and Lansing alumnae in the old tool house back of the Hort building, has been filling a real need on the campus this summer, and during the month of August when all other eating places close, college people who are here and returning alumni will be assured of a place to obtain good food. Coral Havens (with '00) is now managing the tea room, which is being heavily patronized by tourists and Lansing folk.

The Fourth Annual Farmers' Day scheduled for July 29, promises to be the biggest summer farmers' meeting on record. Local farm bureaus and various other organizations from different parts of the state are planning to bring delegations. Visits to the experimental plots and livestock herds, a picnic dinner on the campus, a program in the afternoon, and sports are among the events planned for the entertainment of the visitors. H. H. Halladay, State Commissioner of Agriculture; J. A. Doelle of Marquette, newly elected to the State Board of Agriculture; Dean Mary E. Sweeney and Dean R. S. Shaw are among the speakers.

County agricultural agents from the lower peninsula and extension specialists met at the college on July 28 to make plans for the fall work. Thirty-five were attended.

To tide them over until the new building is made available, excavation has been started for a new auditorium addition to the East Lansing People's Church. The structure, while serving in a temporary capacity as a church auditorium, is to be permanent in character and so constructed as to be easily converted into a store building when its mission to the church has been fulfilled. It will seat about twice as many as the auditorium of the present church and will be connected to it through a basement passageway. The basement of the new building will afford much additional Sunday School and dining rooms space.

Miss Mary Sweeney, Dean of Home Economics, was re-elected president of the national home economics association at the annual meeting held in Boston, June 27-30.

Agricultural Teachers from all over the state gathered at the college for a two weeks' conference which closed July 28. The program included lectures in farm accounting, plant diseases and their control, farm machines and power, drainage and development work, and a discussion of the work of the experiment station. This conference brought about sixty alumni back to the campus. It was in charge of E. E. Gallup '12, State Supervisor of agricultural education.

The "Better Sire Train" which will tour 25 Michigan counties the first three weeks in August under the joint auspices of the college, the Michigan Holstein Friesian Association, railroads and other agricultural organizations, will demonstrate how other phases of farming affect the dairy industry. One entire car will be given over to exhibits and demonstrations on the care of milk in the home, stressing its use in children's diet especially. This car will be in charge of Mrs. Louise Campbell, State Leader of Home Demonstration agents, and she will be assisted by Louella Wilder '16 and Grace Holtrop '17.

THE "FLOWER POT," tea room operated by East Lansing and Lansing alumnae in the old tool house back of the Hort building, has been filling a real need on the campus this summer, and during the month of August when all other eating places close, college people who are here and returning alumni will be assured of a place to obtain good food. Coral Havens (with '00) is now managing the tea room, which is being heavily patronized by tourists and Lansing folk.
"A university which sets out to train its students for life in a real world ought to place adequate emphasis upon those qualities of character which make for success among real men. One of these qualities is punctuality in the performance of duties assigned. In the world at large nobody takes it for granted that work which is slated to be done on Monday morning can just as well be completed on Thursday afternoon; but American colleges are run to a considerable extent on that principle." —Harvard Alumni Bulletin.

The first year of application of the point system of grading students' work has been completed and the final reckoning made. As the points were tallied up for each individual and the results given out two distinct voices could be heard, the first in loud praise, almost a shout, from the faculty, and the other, a groan from that part of the student body whose weight on the point scales had shown them wanting. The students had heard of the point system, they had probably even heard rumors that it was being applied this year, but it was not taken seriously until the results of the three terms reckoning were made known. Then they began to realize what it was all about. Probably the most surprised were the handful of seniors who were kept from finishing with their class because of the lack of a few necessary points in scholarship. There was some discussion among students as to the fairness of applying the point scale the first year to the upper class.

With the point system each grade is accorded a certain number of points and not only must the student pass his courses but his grades must be good enough to give him at the end of the year a certain total number of points. The total demanded in the system adopted here is one which can be had with an average of a C standing or 80 on the scale of 100. In other words the student cannot just "skin through", but in order to continue in scholarship and it is not to be wondered at if the shoe pinches when first put on. The point system is in use and has done much to raise the scholarship standing at many other institutions. It will do so here and the faculty have the congratulations of alumni upon having put it into operation at M. A. C.

At this time of the year many high school students are beginning to wonder what they are going to do next fall—whether they are going to college, and what college. It is a peculiar circumstance that when times are not so good as they have been during the past two years, when wages are not so high, there is more of a tendency for the high school boy to look toward college as a future goal, rather than a good paying job.

We need not say more than to remind M. A. C men and women that there are young people in every community who ought to know about M. A. C. There is "A Greater M. A. C. Straight Ahead" if you send a freshman next fall.
A. M. Barron, Penn. Stater, is New Football Coach.

Announcement of the selection of Albert M. Barron, former Penn State football star, as football coach at the Michigan Agricultural College for a three-year period, was made by Athletic Director Chester L. Brewer following the July meeting of the State Board of Agriculture.

Barron's selection was made only after careful and thorough survey of the available material which included a list of some 75 applicants of the position. Barron was a football player of national repute at Penn State during the years of 1912-13-14-15. During that time he played two years at half back and two seasons at end. In the latter position he gained nationwide prominence which led many critics to plan him on the mythical All-America eleven.

Barron is considered exactly the type to fit the needs at M. A. C. A great football star himself, he has shown conclusively the ability to direct the fortunes of gridiron teams from the sidelines and since he left school in 1916 has been coaching constantly.

Barron's advent will bring a new angle to the Michigan institution, especially from an athletic standpoint. It will be the first time since Coach Macklin's regime that the college will have had the eastern methods of gridiron play installed. Barron is essentially an athlete from the eastern school.

While at Penn State, Barron was not only a football man, but proved himself a student leader as well. Barron was president of the student body organization in his senior year and was editor of the college year book.

Upon his graduation at Penn State, he immediately accepted a position as assistant coach at his Alma Mater. In the following year, he resigned to accept the head coachingship of Bordentown Military Academy. From there he entered the army and it was during the two years that followed that Barron gained recognition as a coach of the first rank.

He was sent to Camp Upton as athletic director and football coach. The Camp Upton team, composed of service men, many of them nationally known football stars, was one of the strongest of all those representing the United States cantonments.

After leaving the army, Barron went to Germantown where he coached the football team at that place. Eastern coaches regard him as one of the best football men in both track and baseball and later developments may prove that he will direct the fortunes of the Aggie baseball team also.

Barron was signed primarily as a football coach, but at Penn State he was a letter man in both track and baseball and later developments may prove that he will direct the fortunes of the Aggie baseball team also.

Mr. Brewer insisted upon a long term contract for Barron's being this method the best prevention for a repetition of the "Potsy" Clark episode. In Barron, Brewer believes he has a find.

Barron will call the gridders together on Sept. 1 for preliminary practice. He will enter the season with the nucleus of a fairly strong team.

St. Joseph County Alumni Picnic Aug. 12.

St. Joe alumni have just made known their intention of holding a picnic at Sand Lake Nottawas, Friday, August 12. The St. Joe Countiytes have become famous for their picnics and anyone who has attended one of their recent celebrations would lose a limb rather than miss the doings on the 12th.

President Kedzie has been asked to be the guest of the St. Joe County folks and bring them a message from the College. President H. C. Bucknell '06 of Centreville and Secretary Vern C. Schaeffer '11 of Sturgis are engineering the affair.

M. A. C. Meets in Dayton, O.

Saturday, June 25, a number of M. A. C. alumni living in Dayton met for a luncheon at the Rike-Kumler Company dinner room. There were fourteen present and the company and the "eats" much enjoyed. Though you might be glad to have a list of those present. We hope to get together again soon.

Those there were Richard Fowler '05, Ella MacAulay Lamb '08, W. E. Savage '17, Mrs. E. Savage '06, Cass A. Lamb '06, Ruth Tibbs Gorton '17, Mrs. Wright Driggs '16, of their Broas Fowler, J. D. Rovick '15, Mrs. N. J. Rovick, Alice Gunn Van Tassell '07.

"Jim" Killoran, Lansing High Trainer, Added to M. A. C. Staff.

Another announcement issuing from the athletic office during July is that of the appointment of "Jim" Killoran on the college coaching staff. Killoran has made a name for himself in inter-scholastic football circles through his work as coach and trainer of the Lansing High School team which has won the state title for the past three years. He was officially titled "Trainer" of the Lansing High squad but his knowledge of the game and ability to play it have made him one of the invaluable aids on the coaching staff.

Killoran played college football at Manhattan College in his palmy days and was regarded as one of the best ends in the East at that time. Killoran's duties will be that of building and developing a freshman team which will give Coach Barron future material for his squad. It is not expected that his efforts however, will be confined to the All-Fresh as there is strong probability that he will be used as one of Barron's first assistants.

The announcement of Killoran's addition to the M. A. C. staff is being met with considerable acclaim by Lansing football followers because of his popularity with the Lansing High Team and his able work with them.
The M. A. C. Union in the year just past has had the most strenuous and energetic one in its history. Besides the usual receptions, dances, smokers, and special affairs, the Union undertook two new tasks last fall, the first, the registration of all students for student activities and the other the production of the musical revue, “Campus Day.”

The organization has been very ably led in its accomplishments by President Maurice B. Rann '21 of Lansing and Vice-President Dorothy Curt '21 of Flint.

Financially, the organization has done very well and will turn over between fifteen hundred and two thousand dollars to the Union Memorial Building Fund from its efforts in the past year.

The new officers elected at the last meeting of the spring term are: President, F. T. Carver '22, Traverse City; Vice-President, Belle Farley '22, Metamora.

It is reported that several proteges of Kiloran’s, who were gridders of stellar magnitude on the Lansing High team last year, will enter M. A. C. this fall.

Purdue's Loss Shared by M. A. C. Men.

The very tragic death of Dr. Winthrop E. Stone, President of Purdue University, who was killed by a fall in the Canadian Rockies, comes as a great shock to his M. A. C. friends of whom there are many.

The relationship between Michigan Agricultural College and Purdue has always been rather intimate and cordial because their places in their respective states are so similar. Dr. Stone was given the honorary degree of LL.D. by the College at its semi-centennial in 1907. He is well-known to President Kedzie, having been his guest at M. A. C. on several occasions and like President Kedzie, having gone to his position as a college executive from a professorship in chemistry. Among the M. A. C. men who have been closely associated with Dr. Stone at Purdue are Charles G. Woodbury '04, formerly Director of the Agricultural Experiment Station at Purdue; Max W. Gardner '12, also of the Experiment Station; L. L. Jones '12, extensionist, and W. C. Latta '77, who was professor of agriculture and later extensionist at Purdue, and has been associated with Dr. Stone for twenty years. Dr. Stone has been President of Purdue since 1900.

Club C, the dining room in the Women's Building, will be operated during the coming year by the home economics department. This will give co-eds wishing to take institutional management an opportunity to study such problems first hand, and will also demonstrate the serving of foods according to home economic principles.

Rotarians in Lansing last week featured M. A. C. at their regular meeting, by means of a “Know Your College” roll call. Each Rotarian was mailed a question about the college several days before the meeting and gave his answer at the roll call. It proved highly instructive to the club.

Dean Sweeney is in Ann Arbor this week where she is delivering a group of lectures to the class in Public Health Nursing at the University. These lectures cover newer discoveries in nutrition, planning budgets on limited incomes, and household management.

More than thirty county fairs will be served by the college crops department with educational displays this fall, according to present plans. Displays will be in charge of Howard C. Rather '17, Extension Specialist.
Association Activities of the Year.

Report of the Secretary at the Annual Meeting, June 15.

There probably has never been a time in the history of the College when alumni have been so on their toes with respect to their Alma Mater, as during the past year. The College's failure to greatly increase its enrollment during the last year together with the criticisms that have been heaped upon us from sources from outside have stirred up individual alumni and alumni in local groups, stimulated their interest and goaded them on to do something for old M. A. C.

This alumni agitation and the alumni criticism which has followed has been of great benefit to the institution. Both graduates and former students have bestirred themselves to push for a greater M. A. C. Their efforts during the fall and winter in bringing out the improvements that have been made and the new propositions they have fostered and carried through are bound to soon place the College where it belongs among other state land grant colleges. We firmly believe that M. A. C. is at the dawn of a great new day and that within a couple of years we will have a greatly enlarged student body and that the opportunities that the College offers and the services that she gives Michigan will be greatly extended. This is certain of accomplishment if alumni continue the interest that they have shown during the past year and keep up their efforts to boost and build their Alma Mater.

During the year, eight new local associations have been formed, those of Barry County, South Haven; Alpena; Calhoun County, Clinton County, Washtenaw County, Saginaw; and Bany City have been reorganized and are now on a much firmer basis than formerly. There is now a total of thirty-six associations. A number of the larger organizations hold weekly meetings and nearly half of them have regular monthly meetings. There seems to be a greater interest in the local associations and more interest to get together and to do something for M. A. C. It is believed that we are in better shape in this regard than we have ever been before.

There have been quite a number of new memberships in the general association during the year, the total now being between twenty-eight and twenty-nine hundred. The class of 1921 has pledged its membership in the Association this spring and nearly every member of the class now at graduation, has signed up as a member.

Among the projects endorsed and actively pushed by the M. A. C. Association which have succeeded in accomplishment during the past year are (1) the lifting of the ban on national fraternities which was proposed by the Detroit Club and endorsed by the general association last commencement, (2) increased scale of salaries of the teaching staff which was urged upon the State Board of Agriculture by the general association last commencement, (3) the undertaking of the campaign for more students in order that the usefulness of the College might be extended and the employment of a Field Agent which was proposed by the Central Michigan Association, (4) the establishment of a newly applied science course which goes into effect next fall, also proposed by the Central Michigan Association.

The committee on the procuring of an appropriate College Seal have done work and had much correspondence but want more time and will be glad of suggestions.

The following individual undertakings of certain groups of alumni during the past year indicate that alumni are alive to their responsibilities and are pushing to a greater M. A. C. straight ahead: (1) the purchasing of a trophy cup by the Detroit Club to be known as the Detroit Alumni Cup and offered to winning teams in the annual spring high school track meet; (2) the purchase of a trophy cup by the Central Michigan Alumni Association to be known as the Central Michigan Alumni Cup and offered to the winning team in the annual winter basketball tournament; (3) the furnishing of a practice house, funds for which some $1,500 are now being earned by the former students of the Home Economics Department in Lansing, East Lansing, and Detroit.

Because of the financial situation, your Executive Committee felt it inadvisable to continue with the Union Memorial Building fund campaign so that there is nothing further to report in connection with the raising of those funds. However in view of the increased building costs and the fact that it was readily discernible that $150,000 would not build a building worthy of the efforts of M. A. C. men and women and worthy of their heroes, the sum of $200,000 was fixed for the Building Fund. Soon after the annual meeting last commencement, your Executive Committee employed as architects of the building, the firm of Pond and Pond of Chicago, who are specialists in the design, planning, and execution of such buildings as our Union Memorial. The Ponds made a study of our situation during the summer and immediately proceeded to draw up and publish plans, the first of which were furnished at the fall home-coming. Since then, there have been some revisions in the floor sketches and the details are now engaging their attention.

The Union organization has earned nearly $2,000 for the Building from various sources during the past year, chiefly from the opera, "Campus Days," and from the song book.
WALTER I. LILLIE '81.
Walter I. Lillie '81 died at his home in Grand Haven on May 20, where he lived practically all of his life.

Before entering M. A. C. he began the study of law in Hon. George A. Farr's office in Grand Haven. He soon realized that a broader culture and knowledge would be of great service to him in law, and he entered M. A. C., resuming his law study immediately upon graduation. He served as Prosecuting Attorney in Ottawa County and later opened an office of his own, where he was in active practice until the time of his death.

He served as Assistant District Attorney and also as Collector of the Port of Grand Haven. Besides the law, he was interested in the banking business and was director and an active member of three different banks and had investments in Western mines.

He leaves a widow and four sons, all of them grown to manhood. Three of them are graduates of the Michigan University. Two sons, Harold and Ivan, are resident physicians and surgeons at the Mayo Bros. Institute at Rochester, Minnesota. The other two sons, Leo and Hugh, were associated with him in the law business at Grand Haven and are continuing the business under the firm name of Lillic, Lillic and Lillic. He was a cousin of Colon C. Lillic '84.

PROF. CHARLES L. WEIL.
Charles L. Weil, Professor of Mechanical Engineering at M. A. C. from 1893 to 1906, died at his home in Port Huron on July 10. His accomplishments at M. A. C. are best expressed in the words of President Kedzie when he said: "Prof. Weil was a strong personality. He was of such positive worth that those who came in contact with him will never forget him. People who casually visit M. A. C. and see its many buildings and its wonderfully broad and beautiful campus are too prone to think of these outward manifestations as the college, when in truth it is personalities and capabilities of such men like Weil that have made and are making the college what it is. The eagerness and capability of Mr. Weil in engineering was remarkable."

It will be remembered that Prof. Weil designed and put into operation the present power and heating system at the college. It is said of him that after leaving the institution he was always interested in M. A. C. and her graduates in engineering. At the time of his death he was Vice-President of the Diamond Crystal Salt Co. A large number of faculty and alumni attended the funeral.

MEETING OF THE STATE BOARD OF AGRICULTURE.

President's Office.
June 14, 1921 11:30 A. M.

Present — President Kedzie, Mrs. Stockman, Messrs. Woodman, Watkins, Waterbury and Beaumont.

The minutes of the previous meeting having been in the hands of the members, were approved without reading.

MARRIAGES

May Persen (with '88) and Lloyd Garfield Kirby of New York City, were married at the home of the bride in Lansing on July 14. For the past year Mrs. Kirby was professor of home economics at M. A. C., and previous to that she was in charge of extension work for two years. They will live in New York City.

Nicholas E. Yonkman (with '18) and Miss Helen Hadley were married on June 22 at Coldwater.

Walter O. Dow '18 and Miss Josephine Crakes of Boyne Falls were married on June 18. They are at home to their friends at 342 E. Higgins St., Howell, where Dow is Resident Engineer for the State Highway department.

Paul L. Ginter '21 and Cora M. Baske '20 were married on July 16. They are living at Madison, Wis., where Ginter is doing industrial investigation work at the Forest Products Laboratory.

Myron Batman Chapin, for four years an instructor in the drawing department at M. A. C. and Miss Margaret Alice Hittle of Chicago were married on July 9. Mr. Chapin will be connected with Person-Cook, advertising artists of Lansing.

Carl H. Knopf '11 and Miss Edith Lilian Nord of Manistee were married on July 10. After a month's motor trip through the Upper Peninsula, they will be at home in Manistee, where Knopf is County Agricultural Agent.

NECROLOGY

MRS. MARY CLIFF CARPENTER '81.

Mrs. Mary Cliff Carpenter '81, wife of Louis George Carpenter '79, died at her home in Denver, Colorado on July 5, and was buried at her old home in Orion, Mich.

Mrs. Carpenter, who as Mrs. Mary Cliff Merrill was librarian at M. A. C. from 1883 to 1888, following her graduation, was well known to M. A. C. people of that time. She was granted a Master of Science degree in 1886. She was married to Mr. Carpenter in 1888.

Mrs. Carpenter was always interested in community affairs of Port Collins and Denver until she became an invalid in 1912, and she contributed poems and articles to various magazines.

Besides her husband, Mrs. Carpenter leaves a son, Lieut. Charles Lewis Carpenter of the Motor Transport Corps, and a daughter, Mrs. Jeanette Emery of Denver.
—and then he took up—CHIN GOLF

Oh, Man!

HERE'S the snappiest game ever! Come on and join the club. No initiation fee; no dues—nothing but fun. It's a whiz!

You see it's like this: Thompson comes in, strutting as proudly as if he had received a raise in salary.

"Well," he says, "I made a 78 this morning. And my face is as smooth as a bank agent's patter."

You ask for particulars, and he explains:

"Chin Golf, old man. New game. All the boys are goin' in for it. Count your strokes when you shave. Out on the right side. In on the left. Slices, pulls, chop strokes, into the rough, and all that sort of thing—all count as in regular golf. Match yourself against Tom, Dick or Harry. Put fun into shaving. Makes it a sport instead of a quarrel with your whiskers."

Do you get the idea? Any one who shaves himself can play Chin Golf. It's being taken up at all the clubs. Office men, bankers, brokers, actors, aviators, soldiers, sailors, college men, shop workers, and senators will be playing Chin Golf.

Get into the game!

Fill out the attached coupon, mail it to us with 10c in stamps, and we will send you a "Handy Grip," containing a trial size Colgate Shaving Stick. Also we will send you, free, a score card, with rules for playing Chin Golf, and a copy of a screamingly funny picture made especially for Colgate & Co. by Briggs, the famous cartoonist. The picture is on heavy paper, suitable for framing or tacking up in locker rooms. It will help you to start every day with a round of fun.

"And then he took up Chin Golf"

COLGATE & CO.
Dept. 212
199 Fulton Street, New York

Enclosed find 10c, for which please send me Colgate's "Handy Grip" with trial size Shaving Stick, the Briggs Cartoon, score card, and rules for Chin Golf.

Name..........................................................................................................

Address.....................................................................................................
On motion of Mr. Waterbury, the bids for the construction of the boiler house were opened and were as follows:

Victor Lunden

£54,880

Ronald Corner Co.

£47,668

H. G. Christman Co.

£45,199

On motion of Mr. Waterbury, the bid of H. G. Christman Co. was accepted, and the Secretary and Architect were authorized to execute contract and take the usual bonds.

The matter of the budget for the ensuing year being before the Board, the following resolution was on motion of Mr. Waterbury, adopted:

RESOLVED, That based upon an estimated income of $1,490,000, we appropriate a sum of $1,480,000 for the budget for the next collegiate year.

That, in order to provide for the necessary cut in the budget, as presented, the necessary reduction be spread among the various departments, and that the President and Secretary be authorized to confer with heads of departments and fix the proportions of the reduction.

On motion of Mr. Watkins, the resignation of Ezra Levin, from the Extension and Experiment Station of the College, was accepted effective June 9th.

The President presented the following letter of resignation from Prof. Burgess:

June 13, 1921.

President F. S. Kedzie

My dear President:—I have with deepest regret that I tender you my resignation from the position of Professor of Poultry Husbandry to take effect on January 1, 1922. If it meets with the approval of yourself and the State Board of Agriculture, I would ask that I be given a leave of absence till January 1 from July 1 next with full pay in order that I may devote myself to the task of finding another position.

At this time I wish to thank not only you but the members of the Board as well as Dean Shaw for the permission to continue my work while in this institution and for the many courtesies extended me from time to time.

Yours very truly,

(Signed) C. H. Burgess,

Professor of Poultry Husbandry.

On motion of Mr. Woodman, the resignation of Dr. Darlington was granted a like consideration for the winter term only.

On motion of Mr. Baldwin, the bids of the Christman Co., being the lowest, was accepted and the contracts were as follows:

£1,490,000

£1,480,000

£63.37

The appropriation of $70,000 is available and the contracts extended me from time to time.

On motion of Mr. Baldwin, the communication from Dr. Chamberlain regarding the Veterinary Division was laid upon the table until the next meeting.

On motion of Mr. Waterbury, the communication from Dr. Chamberlain the proposed budget, was adopted:

That, in order to provide for the necessary cut in the budget, as presented, the necessary reduction be spread among the various departments, and that the President and Secretary be authorized to confer with heads of departments and fix the proportions of the reduction.

On motion of Mr. Watkins, the reorganization of the Home Economics Division as recommended in the following letter from Dean Sweeny, was approved:

June 9, 1921.

State Board of Agriculture

Gentlemen:

After conference with President Kedzie and Secretary Brown, as Dean of the Home Economics Division, I wish to present to the State Board of Agriculture the following recommendations for some desirable reorganization in the Division:

1. That the departments within the Home Economics Division of Household Art and Household Science, be abolished. Firstly, because these departments do not represent either a logical or natural division of the different lines of work offered. Secondly, because they seriously hamper the efficiency of the administration of the affairs of the division, and lead to needless expenditure in labor and equipment. Thirdly, they limit the normal growth and development of the resident teaching and place unnatural distinction between lines of work very closely correlated.

2. That all positions of heads of Household Art and Household Science be discontinued.

3. That all professors, associate and assistant professors, and instructors be directed to remain in their present work or come to the Dean of the Division for all duties connected with their resident teaching work.

4. All professors, associate professors, assistant professors and instructors shall be designated as Professor of Home Economics, Associate Professor of Home Economics, Assistant Professor of Home Economics and Instructor in Home Economics.

5. That three be authorized to the appointment of an assistant to the Dean, with such rank and qualification as may be deemed advisable. Part of said person's time to be devoted to resident teaching and large portion to assisting in the administration of the division.

6. That the charge be placed under the management of the Home Economics Division September 1, 1921, that it be put in charge of a member of the teaching staff and the division and director of the course in Home Economics, be changed, and that the charge be directly responsible for the purchase, hiring of labor, and the conduct of all business connected with the Club and shall be responsible to the Dean of the Division and to the Secretary of the College for all receipts and expenditures.

Yours respectfully,

(Signed) Mary E. Sweeny,

Dean of Home Economics.

On motion of Mrs. Stockman, the organization of the Teacher Training Department as recommended in the following letter from Professor French, was approved:

June 9, 1921.

President F. S. Kedzie

My dear President:

I have been considering the organization of the Teacher Training Department and I have reached this conclusion—that we should give Dean Mary E. Sweeny a Director, I. E. Millar and Dr. Hibbard for leave of absence on half pay for the ensuing year, were granted on the condition that there shall be no expense on the part of the departments for substitutes; and Mr. Millar was granted a like consideration for the winter term only.

On motion of Mr. Watkins, leave of absence was granted to Mr. Jack Heppinstall from June 15th to September 1st in order that he may visit his home in England with the provision that there shall be no additional expense to the department by reason of vacancies.

On motion of Mr. Woodman, the matter of the erection of a shed and silos for the Animal Husbandry Department was adopted, and the communication was filed until the next meeting.

On motion of Mr. Waterbury, the reorganization of the Home Economics Division was adopted as recommended in the following letter from Dean Sweeny, was approved:

June 9, 1921.

State Board of Agriculture

Gentlemen:

After conference with President Kedzie and Secretary Brown, as Dean of the Home Economics Division, I wish to present to the State Board of Agriculture the following recommendations for some desirable reorganization in the Division:

1. That the departments within the Home Economics Division of Household Art and Household Science, be abolished. Firstly, because these departments do not represent either a logical or natural division of the different lines of work offered. Secondly, because they seriously hamper the efficiency of the administration of the affairs of the division, and lead to needless expenditure in labor and equipment. Thirdly, they limit the normal growth and development of the resident teaching and place unnatural distinction between lines of work very closely correlated.

2. That all positions of heads of Household Art and Household Science be discontinued.

3. That all professors, associate and assistant professors, and instructors be directed to remain in their present work or come to the Dean of the Division for all duties connected with their resident teaching work.

4. All professors, associate professors, assistant professors and instructors shall be designated as Professor of Home Economics, Associate Professor of Home Economics, Assistant Professor of Home Economics and Instructor in Home Economics.

5. That there be authorized to the appointment of an assistant to Dean, with such rank and qualification as may be deemed advisable. Part of said person's time to be devoted to resident teaching and large portion to assisting in the administration of the division.

6. That the charge be placed under the management of the Home Economics Division September 1, 1921, that it be put in charge of a member of the teaching staff and the division and director of the course in Home Economics, be changed, and that the charge be directly responsible for the purchase, hiring of labor, and the conduct of all business connected with the Club and shall be responsible to the Dean of the Division and to the Secretary of the College for all receipts and expenditures.

Yours respectfully,

(Signed) Mary E. Sweeny,

Dean of Home Economics.
Associate Professor of Home Economics Education and Miss Josephine Hart, Assistant Professor of Home Economics Education. On the Agricultural side, Mr. Grover is Associate Professor of Agricultural Education and Mr. Wallpole will be Assistant Professor of Agricultural Education. Such an arrangement as I have suggested above, seems to me to strengthen matters as much as Dean Sweeney the position and authority she should have in connection with the matter of teacher training.

My relation to the Home Economics Practice Teaching is general oversight as Director, but it should be specifically handled by the Department of Home Economics.

If this meets with your approval, I should be glad to have the State Board of Agriculture take action accordingly.

Very respectfully,
(Signed) W. H. French

Degrees were granted. (List previously published in Record).

On motion of Mrs. Stockman, a three years' teachers certificate was authorized to be issued to Herman A. Andrews who graduated in 1917.

On motion of Mr. Watkins, the Secretary was authorized to increase the salary of Miss May Persons in remuneration of her services as Acting Dean, same to be paid in monthly installments during the balance of the college year.

The following letter was presented from May E. Foley, of the Agricultural College, for the purpose of asking to aid in furnishing a practice house for the Home Economics Department:

Mrs. Dora Stockman,
East Lansing Mich.

Dear Mrs. Stockman:

At your request, I am writing to inform the State Board of Agriculture, that on May 8 the former women students of the Michigan Agricultural College, living at Lansing and East Lansing, pledged themselves on behalf of the entire alumnae body, to raise $500 before college opens in the fall, for the furnishing of a practice house for the Home Economics Department.

We have now on deposit in the East Lansing bank and in the hands of the committee over $300, which has been raised by East Lansing women alone. The committee wishes to pledge itself to be personally responsible for the raising of the entire amount of $500 before October 1, and would like to place this in the hands of the State Board if they wish to accept it.

Respectfully yours,
(Signed) May E. Foley, '18.

On motion of Mrs. Stockman, the following resolution was adopted:

Resolved that the State Board of Agriculture accept with thanks the gift of alumnae for the furnishing of the practice house for the Home Economics Department, and especially do we wish to express our appreciation of the fine spirit of loyalty and support of the former women students, and we feel it is a wonderful inspiration to our women's work at Michigan Agricultural College.

The Secretary presented a request for the purchase of certain timber on lands belonging to the College which, on motion of Mr. Beaumont, was laid upon the table.

On motion of Mr. Beaumont, the boundary matter upon the so-called "Woodbury Farm" was referred to the Attorney General for advice.

On motion of Mr. Woodman, it was directed that a special meeting of the Board be called previous to the next regular meeting to consider the appointment of a president.

On motion adjourned.

CLASS NOTES

C. P. Gillette, Head of the Department of Zoology and Entomology, Director of the Experiment Station, and State Entomologist at the Colorado Agricultural College, Ft. Collins, sends greetings to his classmates.

And so says George L. Spangler, Attorney at Law, St. Paul, Minn., resident, Forest Lake.

Dale A. Smith lives at 2246 Lawrence St., Point Loma, Calif.

Charles Fuller, Baker, Dean, and Professor of Tropical Agriculture, College of Agriculture, University of the Philippines, and Director of the Experiment Station, is also Acting Dean of Veterinary Science.

Frank R. Poss, mining and timber lands operator of New York City visited the campus July 8 while being entertained by his former college mate Benj. F. Simons of Lansing. Mr. Poss was enroute from California to New York City and it was the first time he has been on the campus in a number of years.

On a card dated July 4, mailed from Washington, William W. Taylor, Jr., states that he is leaving for Paris to attend the Ecole Superieure de Guerre for two years. His business address will be Licut. Colonel, U. S. Army, care of Military Attache, United States Embassy, Paris.

Lois D. Sees of Unionville sends greetings.

This from Charles W. Hale, 86 E. 88th St. N., Portland, Oregon: "Present occupation is Chief Engineer for Ball Engineering Co., 443 N. W. Bank Bldg. We have three children, Verna Mbe 18, Helen Marie 15, William Day 9, all doing fine. Verna graduated this month from the Girls Polytechnic School. Look us up when in Portland."

Benjamin Lubisch is still with the Electric Light Department, Connacott, Ohio.

Mark G. Crosby (with) who is running the old hose farm near Hart, announces the arrival on May 25 of Raymond and Redmond who will be ready for the class of '24, Daniel Sears age 11, Matt A. age 6, and Francis May 3, will be ready for earlier classes.

Among the speakers at the thirty-fifth annual assembly of Laurel Park Chautaugua beginning July 14, writes Dr. Besi, "was Glenn C. Sevey, in a lecture on 'The Regeneration of Bill Jones'." Mr. Sevey is editor of the New England Homestead.

George Tryon sends greetings from Great Falls, Montana, where he is still Mechanical Superintendent of the Anaconda Copper Mining Co.

"Jake" Prost, for his summer vacation, is managing a 22,000 acre "spud" farm at Starks, Oneida County, Wisconsin. "You may extend to all M. A. C. volunteers," he writes, "who happen to tour, fish, or camp in northern Wisconsin, an invitation to call on us, at Starks, a town located 15 miles east of Rhinelander. We have good fishing in our own Stella Lake, and there are a world of small lakes about us. You too may publish this invitation in the Record. I am for everything for the welfare of good old M. A. C. and opening the Memorial Building campaign again this fall. We will be back in Chicago about the middle of October."
Clare Winston and Mrs. Winston (Rhoda Reed) are now located at Fort Wamacha, Hawaii, where he is a Captain in the 5th Coast Artillery U. S. Army. Hawaiian Islands are great," they write. "We are transferred here about a month ago. I am Motor Transport Officer for the 5th Artillery. Our guns are 155 mm. French type, tractor drawn. Met several M. A. C. people here and we are planning on a get-together Commencement week. Don Stroh ’15, George Caldwell ’16, Smith ’16, and Rudelius ’17, and a few others are on this mid-Pacific oasis. Tell all M. A. C. tourists to be sure and include us in their itinerary."

Harold A. Cochran (with) has built a new home at 444 Walnut St., Manistique. Any M. A. C. friends driving through, he says, may be sure of room and board if they stop at the local express office first.

Gideon Smith will be football coach and assistant physical director at Hampton Institute, Hampton, Va., the coming year. Hampton is his first Alma Mater.

Rutherford U. Bryant is now at Hastings, R. R. No. 4.

Howard N. Renwicke, "Mose," is working for the State Farm Bureau and lives at 914 W. Saginaw St., Lansing.

Dr. A. E. George has a good practice in veterinary medicine at Athens, Wis., and is a breeder of pure-bred Guernsey cattle.

Kenneth C. Kernen asks to have his Record sent to 446 Allen St., Lansing.

An important message to every Dairyman—

HAVE you stopped feeding since the flush of grass has been on? It is a great temptation to cut down heavily on your grain ration in the early summer when pastures are good. Don't do it.

The prosperous dairyman stops feeding for only a short time and gets the best results by light summer graining when growing feed is plentiful. In this way your cows will be kept up to condition, and will be equal to any demand put upon them in the way of heavy feeding during the winter months.

For summer feeding get a supply of Buffalo Corn Gluten Feed and mix two parts with one part of wheat bran, or one part of ground oats.

For every four pounds of milk feed one pound of this mixture. Watch the condition of your herd and the satisfactory amount of milk they give.

Buffalo Corn Gluten Feed, which is a straight corn feed, contains the most nutritious parts for animal feeding. It will solve your feed problems for you.

Feed up—with Buffalo Corn Gluten Feed!

Corn Products Refining Co.
New York Chicago
IN the rush of present-day living, very few of us ever stop for a moment to sum up the benefits of modern civilization or to contrast them with past inconveniences.

Electricity, for instance. Marvelous, we say, but there we stop. What makes it marvelous? Not what has been done, but rather what yet remains to be accomplished. It is the undeveloped possibilities of this magic force which make the whole world wonder what will come next.

And it is the future which will determine just to what extent electricity may become a faithful servant of the public. The past achievements of the General Electric Company are now everyday history—from the chaining of Nature to create electric power, to the vast number of ways for making that power useful in the daily life of every human being.

Each year has seen some new contribution from G.E. to the world's progress. That this will continue is certain, because of the fact that this whole organization and its remarkable facilities are devoted to studying the requirements of mankind in every walk of life and fully satisfying them with something electrical.
