President Mackey called the meeting to order in Room 106, Kellogg Center, at 7:20 p.m., September 24.

Present: Trustees Bruff, Fletcher, Howe, Krolikowski, Lick (arrived during the Investment Committee), Martin (arrived during the Investment Committee), Reed and Sawyer (arrived during the Investment Committee); President Mackey, Provost Winder, Vice Presidents Breslin, Cantlon, Dickinson, Schonbein, Stewart, Thompson and Turner; Associate Vice President and Acting Secretary Wilkinson, General Counsel Carr, Assistant to the President Carlisle, Faculty Liaison Group and Student Liaison Group.

1. Approval of Proposed Agenda

Trustee Bruff moved approval of the proposed agenda with the change that the Resolution on the International Year would be considered by the Board following the Public Comments session. Seconded by Trustee Howe. Approved by a vote of 5 to 0.

2. Approval of the July 23-24, 1981, Minutes

Moved by Trustee Bruff, seconded by Trustee Fletcher, to approve the minutes of the July 23-24, 1981, Board meeting. Approved by a vote of 5 to 0.

The Board recessed for a meeting of the Investment Committee.

The Board reconvened at 8:10 p.m.

3. Public Comments

Professor Byron Brown, Department of Economics, representing the AAUP, stated that in his opinion faculty were generally confused between a budget crisis represented by cash flow problems and a budget crisis represented by reductions in continuing based budgets. He also commented that in his opinion there are problems with faculty morale on campus.

Professor Mordechai Kreinin, former Chairperson of the University Committee on Academic Environment, commented on the proposed parking structure. He stated that the Trustees could construct a temporary lot which was a reversible decision, but the construction of a ramp was an irreversible action. He would recommend that the Board build the temporary structure until a market test of approximately two years' use had been completed.

Mr. Morey Smerling, student, commented on the University's academic excellence and the need to construct a parking facility adjacent to the Performing Arts Center. He stated that he felt that all faculty, students and staff should support the construction of the ramp and urged the Board to take action to approve the construction bids.

4. International Year Resolution

President Mackey then introduced Dr. Ralph Smuckler, Dean of International Programs, who summarized Michigan State University's involvement in international programs and urged the Board to adopt a resolution recognizing the University's 25th anniversary of this activity.

International Year Resolution

Whereas, the Board of Trustees of Michigan State University on October 19, 1956, acted to encourage a significant international direction to this University's education, research and service programs by creating the first University-wide office of Dean of International Programs by any major American university; and

Whereas, the University is now entering the 25th anniversary year of international activity which has contributed to a world-wide reputation for Michigan State, encouraged numerous programs aiding people and institutions in developing countries, assisted thousands of MSU foreign students who now work productively in many other countries, led to excellent programs of international study and research on campus and abroad, and helped to create an environment and spirit on campus which is far more international and cosmopolitan than that which existed in 1956; and

4. International Year Resolution, cont.

Whereas, the need for strong international emphasis in the many study programs of the University is undiminished and indeed even greater now than 25 years ago, due to the increasingly close relationship of this society's future to that of others in all parts of the world;

Therefore, the Board of Trustees hereby designates this 1981-82 academic year as INTERNATIONAL YEAR at Michigan State University, reaffirming its recognition of and commitment to the importance of an international dimension in all appropriate University programs. Through this action, we encourage events and programs on campus and internationally throughout the year which will reflect that commitment. At the end of the International Year, the President is hereby requested to report on the activity and programs conducted on campus and abroad.

Trustee Sawyer moved approval of the International Year Resolution, seconded by Trustee Bruff. Approved by a vote of 8 to 0.

5. Construction of Parking Ramp No. 3

President Mackey summarized briefly the history of this project and stated that the governance system had thoroughly debated the issues relating to the construction and the financing of the proposed facility. Several persons, various employee groups, and the University community also addressed the Board on this subject. The President indicated that the Board had four alternatives before them which were summarized in a schedule and is on file in the Secretary's Office.

President Mackey recommended that the Board construct a temporary parking lot to serve the Performing Arts Center at a cost of approximately $373,000. He stated that with the current economic climate within the State and the possibility of future Executive Orders, along with the fact that the final funding plan for the PAC was yet to be developed, he felt this was the most favorable alternative at this time. He stated that he would recommend that the University, at a future date, construct a permanent parking facility adjacent to this facility. He stated that his second choice would be to construct a parking ramp of approximately 573 spaces at a cost of approximately $2.8 million with no less than half of the cost to be financed from the parking system. He stated that our tuition rates are relatively high at this time and he would not want to add to the tuition burden for the full construction costs of this facility.

At its July 23-24, 1981, and August 19, 1981, meetings, the Board of Trustees considered bids for the construction of Parking Ramp No. 3 and deferred action on this item pending further review of the financing program by the Administration.

The following bids were received on June 2, 1981, for construction of Parking Ramp No. 3. This project involves construction of a five-level, 985-space parking structure attached to the east side of the Performing Arts Center with an entrance at the Center's concourse level. The ramp will be constructed from cast in place concrete with a brick veneer matching that of the Performing Arts Center. Other features include two 4,000-pound capacity hydraulic elevators, two stair towers, energy efficient high pressure sodium lighting, and epoxy coated reinforcing steel for longer life. Also included is construction of a shop for scenery fabrication. Alternate No. 1 provides for interior finishing of the scene shop.

Trustee Fletcher moved that the construction bids received be rejected. Seconded by Trustee Martin. Approved by a vote of 6 to 2. Trustees Reed and Krolikowski voted No.

In response to Trustees' questions, Vice President Thompson indicated that currently $.41 per credit hour is available for debt service and of this amount approximately $.28 is not currently designated for a specific project but has been considered as available to provide permanent financing for the Performing Arts Center.

Trustee Bruff stated that if a smaller ramp was constructed, that it would be possible to finance this project internally without increasing either student fees or parking rates during the 1981-82 fiscal year.

On a motion by Trustee Bruff, supported by Trustee Reed, it was recommended that the Administration solicit bids for a ramp of approximately 573 spaces, construction to be internally financed, to be repaid 50% from revenue generated from the parking system and 50% from student fees and that the Trustees consider these bids at their October 23 meeting. Approved by a vote of 5 to 3. Trustees Howe, Lick and Martin voted No.

6. Presentation on University's Enhancement of State Economy by Vice President John E. Cantlon and Deans James H. Anderson, L. W. VonTersch, Richard U. Byerrum and Richard J. Lewis

C. OTHER ITEMS FOR ACTION

1. College of Education Reorganization

The Modified Coordinated Proposal approved by the Board of Trustees on April 4, 1981, contained a provision that the number of departments in the College of Education be reduced from six to four. Dean Judith Lanier, College of Education, recommends a specific reorganization of the College to implement this provision. This reorganization plan is based on thorough deliberations within the College, and has been discussed with the Executive Committee of Academic Council.

The current departmental organization of the College includes the Department of Administration and Higher Education, Department of Counseling and Educational Psychology, Department of Elementary and Special Education, Department of Health, Physical Education and Recreation, Department of Secondary Education and Curriculum, and the Division of Student Teaching and Professional Development. The reorganized departmental structure includes the Department of Administration and Curriculum, Department of Counseling, Educational Psychology and Special Education, Department of Teacher Education, and Department of Health and Physical Education.

It is recommended that this request be approved.

RESOLVED that the College of Education be reorganized effective September 1, 1981, as recommended.

Approved by a vote of 8 to 0 on motion by Trustee Reed, seconded by Trustee Fletcher.

2. Funding of Employee Incentive Plans

At its July 24, 1981 meeting, the Board of Trustees approved the use of up to $1,800,000 in the first faculty incentive program designed to encourage early retirement and other options. The program was designed to reduce the number of tenured faculty and job security specialists at risk as a result of program decisions implemented through the Modified Coordinated Proposal.

The liability for the first program offering was established at $1,800,000 because, after accommodating the budget reductions which occurred during the appropriation process as well as several executive orders, the incentive program could not be funded beyond this amount.

The use of $1,728,394 of the $1,800,000 in the first faculty incentive program has created a salary and fringe benefit lapse in the 1981-82 transition budget of approximately $1,000,000. We estimate that additional reductions in transition funds from turnover and other changes will provide approximately $600,000.

Both administrators and faculty have expressed an interest in offering additional incentive opportunities in an effort to reduce further the number of faculty and job security specialists at risk. The Office of the Provost estimates the remaining at risk positions to be 46. Although it is certainly not necessary to offer incentives to all, due to a small amount of normal attrition in the areas of the program reductions, we continue to place a high priority on the earliest possible resolution of all personnel effects of program decision.

RESOLVED that the President is authorized to expend from salary lapse and transition funds an amount up to $1,600,000 for the purpose of implementing additional incentive plans.

Approved by a vote of 8 to 0 on motion by Trustee Reed, seconded by Trustee Fletcher.

D. REPORTS TO THE BOARD

1. Board Committee Reports

a. Audit Committee

Trustee Sawyer reported that the Audit Committee met and reviewed in detail the draft financial statements presented by Ernst & Whinney and the University's administrative staff.

At the conclusion of the meeting, it was voted to recommend to the Board that the financial reports be accepted.

Approved by a vote of 8 to 0 on motion by Trustee Sawyer, seconded by Trustee Fletcher.
b. Investment Committee

Trustee Krolikowski reported that the Investment Committee interviewed David B. Thurston of Cambridge Associates, Inc., and Ned Joachimi and Thomas Askey of Investment Management Control Systems. These firms are two of three candidates to be considered as consultants to assist in the process of reviewing investment managers and in the refinement of the University's performance measurement reports in accordance with the intent of the Committee as determined at its May 22, 1981, meeting.

The Committee met on Thursday, September 24, 1981, to interview Jim Knupp of Ennis, Knupp, and Gold, the last of the three consultant candidates.

c. Land and Physical Facilities Committee

Trustee Lick reported that the Land and Physical Facilities Committee met in an Executive Session to consider the purchase of 3.7 acres of land in Saugatuck Township, Allegan County, adjoining the Douglas Farm of the Trevor Nichols Complex in Fennville, Michigan.

Trustee Lick further reported that the Trustees considered an offer by the Blue Star Realty Company of South Haven to purchase 29 acres in Geneva Township at the South Haven Experiment Station for $30,000. The offer was referred back to Vice President Breslin for consideration of more favorable terms, including higher interest rate, if possible, and a shorter term.

Trustee Lick reported that the Committee recommended that the University engage the architectural firm of Graheck, Bell, Kline and Brown for the addition and the remodeling of the Veterinary Clinical Center.

Approved by a vote of 8 to 0 on motion by Trustee Reed, seconded by Trustee Martin.

Trustee Lick stated that the Committee recommended that the Turfgrass Research Center be named the Hancock Turfgrass Research Center in honor of Mr. Robert Hancock who made a substantial financial contribution for the construction of this facility.

Approved by a vote of 8 to 0 on motion by Trustee Martin, seconded by Trustee Krolikowski.

2. President's Report

President Mackey asked Vice President Breslin to update the Board on possible Executive Order reductions from the State. Mr. Breslin reported that the information had changed daily and that the Governor's original recommendation called for an Executive Order of approximately 4.5% for higher education. This was rejected by the Legislature and the revised Executive Order is approximately 2.5%. Mr. Breslin stated that the final recommendation would be known prior to September 30, 1981.

President Mackey asked Provost Winder to comment on fall term enrollment. Dr. Winder indicated that as of the first day of classes, the total East Lansing campus enrollment is 41,115 compared to 43,996 as of a year ago. Dr. Winder projects that fall term enrollment will be approximately 42,100 which is 1,000 below our previous projections.

On behalf of the Board of Trustees, Chairperson John Bruff read the following statement:

Michigan State University, this nation's pioneer land grant University, is a vital part of this state's system of higher education. Its strength and the quality of its academic programs have been built over a period of 126 years. The role it plays in teaching, research and public service is unique. Its viability is critical to the future of the State of Michigan. We, the Trustees of MSU, are obligated to inform the people of Michigan that this great University is now in serious jeopardy.

It is our further obligation to urge, in the strongest terms, the actions necessary to preserve this institution.

The financial problems of the past 18 months have had a crushing impact. Coming on the heels of a decade of underfunding, the cutbacks and withdrawals have affected every aspect of the University.
The people of the State of Michigan have a long and proud history of strong support of their public colleges and universities. Farmers, shopkeepers, factory workers, and others taxed themselves as necessary so their sons and daughters would have educational opportunities and better lives. Public universities of Michigan achieved universal recognition for academic excellence compared with the higher education institutions of the other states.

In the 1970s, as Michigan's economic problems became more severe, appropriations for public universities and colleges lagged further and further behind other states and reached an alarmingly low level in 1980-81.

We, the Board of Trustees of Michigan State University, must now inform the people of Michigan that this great public university will suffer irreparable harm if the recent state funding trend continues. Increased appropriations to Michigan State University are essential in the years ahead.

MSU has acted vigorously to solve as many of its problems as possible on its own initiative. MSU has attracted increasing levels of federal and foundation funding to support many of its activities. These federal and foundation awards are the strongest possible evidence that MSU is a worldclass university.

The Board of Trustees of Michigan State University took an unprecedented, major action on April 4, 1981, to curtail and eliminate programs and to reduce administrative and operating costs to the lowest possible levels. Further budget reductions will diminish the quality of Michigan State University and if continued, will reduce Michigan State University from a first rank to a mediocre institution.

Michigan State University has acted to save itself. Now help must come from outside the University in the form of increased funds to attract and retain top-quality faculty, to pay for the increasing costs of instruction, research and public service, to provide modern facilities and equipment, and to arrest the rapid increase in tuition.

The people of Michigan must decide on the future of public higher education in the next few months. The choice is clear. Either there will be a return to the historic commitment to public financial support of excellent public universities here in Michigan, or the public universities, including Michigan State University, will deteriorate rapidly.

The people of Michigan need and depend on first class universities. MSU has contributed to the economic growth of the state from the beginning of its existence in 1855. As MSU has grown strong, its contributions to agriculture, business, technological advance and the professions have become more and more essential to the economy of the state and the quality of life here. It is ironic, self-defeating and tragic to allow this fundamental public resource to deteriorate at the very time when Michigan must find new solutions to its problems. The Colleges of Michigan State University, such as Agriculture and Natural Resources, Engineering, Business and others, have the experts, the ability and the determination to help the state. Now is the time for greater investment in MSU in sharp contrast to the recent reduction of financial support.

Excellent public Michigan universities must receive higher priority in the appropriation decisions of the legislature. This will require the same kind of difficult decision making, setting of priorities and reallocation of funds that has already taken place in this University. The result may well be less support for some other tax supported state programs.

This is a time for vision and courage. Delay will result in a precipitous loss of the excellent that is still present. Full funding of appropriations to Michigan State University and the other major public universities of this state are indispensable now and in the years ahead. We call on the many citizens of Michigan who have benefited from our excellent universities to ensure that future generations will enjoy these same benefits. We urge the citizens of Michigan and their representatives in State government to take action to preserve the excellence of Michigan State University, just as in the past citizens acted to build excellence for the benefit of all.
