Music report.

On motion of Mr. Broay, it was voted to accept the following report as read by Mr. Broay:

"Your Committee has given careful consideration to the Music Building project presented to the Board on different occasions by Messrs. Richards and Anderson.

We have been advised by the Attorney General that the only legal and satisfactory manner in which to handle the project would be for the State Board of Agriculture to assume full responsibility for construction of the building, payment of bonds, etc. Here it was possible to proceed at this time, the Committee would favor such a plan in preference to the other course submitted providing for a lease of the ground to the Institute, with the building control outside of the College authority. Your Committee, however, does not feel it advisable to proceed at this time, for the following reasons:

First; the project would require the sale of bonds, and the assuming by the College of a further debt of several hundred thousand dollars.

Second; the College has already assumed responsibility for heavy financial obligations in connection with the Stadium and the Women's Dormitory.

Third; the probability of having to assume further major financial obligations in connection with the Union Building.

The Committee does recommend, however, that when it is possible to secure a legislative appropriation for building the auditorium included in the plans already submitted to the State, that due consideration be given to providing space required by the Music Department.

In making this report, your committee does so with a full appreciation of the excellent progress being made by the Music Department under the direction of Mr.
Richards, and believes that until such time as the College can see its way clear to provide permanent quarters for the Music Department, the Board should lend its best cooperation through temporary means to meet the growing needs of the Department.
