17. Communication from Mrs. Margaret Plant Thorp, as follows:

"I wish to express for my family our great appreciation for all that Michigan State University has done for us in recent weeks. The floral arrangement, in green and white, was unusually beautiful. The plan of the University in regard to insurance and continuance of salary is very generous and deeply appreciated at such a time. I wish that my husband could have served the University for many more years, for his work was such a very important part of his life, and he devoted himself unsparingly to it."

18. Communication from the University attorney relative to the estate of Justin T. Wight, deceased, as follows:

"Mr. Wight's Will provides for specific bequests amounting to approximately $300,000.00 which leaves about $65,000.00 in the residue. The State Board of Agriculture is named as the beneficiary of one share of the residue which should constitute about twenty-five percent of the sum indicated. It is an unrestricted gift which provides that said sum is 'to be held by said Board of Agriculture and to be used and managed for the purpose of carrying out the objectives of said College.'

"According to California law, distribution can occur six months after the publication of notice to creditors. However, it appears that the deceased had guaranteed approximately $50,000.00 of promissory notes of other persons and the final payment of these notes is not due until September 26, 1956. Accordingly, those guaranties, being conditional liabilities of the estate, may postpone distribution until after that liability is removed."

ADDITIONAL ITEMS, continued

Miscellaneous, continued:

40. Farm Bureau Resolution, continued:

"We are proud of the century or service rendered to Michigan farm families and other citizens by Michigan State University, the pioneer land-grant institution."

"Present day agriculture has become increasingly complicated and is beset with manifold problems in the field of production, distribution, and management."

"Research is the lamp which lights the path of progress. However, it would be impossible for the individual farmer to carry on very much basic or applied research. That must be done, in the case of agriculture, by a large public institution, such as Michigan State University."

"The results of research and experimentation must be conveyed promptly to those whom they would benefit. They must be put to work in the service of mankind. The most efficient machinery yet developed for this purpose is the Agricultural Extension Service, including the County Agricultural Agents, 4-H Agents, Home Demonstration Agents, and Extension Specialists. These activities have abundantly proved their worth and deserve continued growth and development."

"We especially commend the 2-year old program of research and education, to encourage the expanded utilization of Michigan farm products. This has provided great benefits to producers, retailers and handlers of Michigan-grown food and holds promise of still more far-reaching services to all Michigan citizens. It is a statesmanlike pioneer effort which is attracting favorable national attention. It deserves our wholehearted and cooperative support."

43. It is recommended that Mr. Sarvis, architect of Battle Creek, be authorized to prepare plans and specifications for the installation of air conditioning in the Kellogg Center and to secure bids in accordance with these specifications for consideration by the Board.
